

# THE GUINEA PIG

## EXCITING NEW ORGANIC WINES FROM FRANCE SUPPLIED BY FEBVRE WINES

*Organic farming is based on the management of the living part of the soil, respecting biological cycles and the environment, for a healthier production, both more economical and more independent. Feed the soil to feed the plant, stimulate the biological activity of the soil, help the plant to resist disease and pests without contaminating the environment, avoid trace residue, maintain as far as possible an integrity with regard to the natural surroundings. These are the basic objectives of biological farming.*

### **Cotes du Rhone Domaine des Carabinieres 2008**

**€28.85**

*A delicious red wine of excellent quality and a true pleasure to drink. Blackberry and blackcurrant aromas come forward from this deep crimson red wine. A subtle blend of fruit and spices await the palate*

### **Terra Sana Sauvignon Blanc 2010**

**€24.40**

*Pale yellow and very expressive, showing aromas of white fruit and honey. Fresh, round and ample, with a wonderful freshness.*

### **Domaine de Petite Roubie Rose**

**€23.00**

*With its rich rose petal colour, it is a brilliant and limpid wine. It is fresh and pleasantly vigorous with red fruit aromas mingled with a perfect touch of mineral notes*
